

DISTRICT HEATING: SPECIALISTS IN HEAT EXCHANGER AND BOILER EQUIPMENT SERVICES

We provide the widest range of heat exchanger products and services from a UK supplier to help customers in the district heating industry minimise downtime and maximise performance of their equipment. As experts in heat exchanger and boiler technology, we offer district heating optimisation, decarbonisation and solutions for existing and new schemes.

DESIGN & ENGINEERING

Our certificated facilities and highly experienced and qualified team of engineers, fabricators and site specialists deliver the most effective and efficient district heating projects. Whether it's design of new equipment using leading software including AspenTech, Autodesk AutoCAD and Inventor, or manufacture of like for like products, our team excels in devising innovative and cost-effective solutions to your district heating challenges.

TESTING

Our comprehensive testing services have been developed to meet the highest standards such as the specific needs of the food and drink industry and detect even minute cracks and pinholes. They include full diagnostic and flow rate checks, non-destructive, low pressure and holding time testing and helium tests that analyse minuscule molecular composition. We also offer bespoke tests to suit customers' requirements.

REPAIR & REFURBISHMENT

Our customers rely on us to respond quickly and cost-effectively to keep their systems working at optimum levels. Whether it's round the clock call out for emergency repairs at a remote customer location, or planned refurbishment of equipment in our in-house service facilities, we provide what's needed on time every time.

BOILER CONTROLS & INSTRUMENTS

We can service, repair and maintain all makes and model of steam boilers, burners, valves, controls, instruments and associated equipment. We also provide energy saving upgrades to steam plant that include manufacture and installation.

INSTALL & SITE SERVICES

Our dedicated projects team offers a wide range of services around the world 24/7 tailored to meet the individual needs of our customers. Services include inspections and surveys, gasketing, servicing and installation of manufacture or repaired heat exchangers, equipment overhaul, boiler replacements and district heating network servicing.

SPARES

We supply spares for virtually any make of district heating boiler, burner and associated equipment as well as gaskets from most leading OEMs. We also manufacture gaskets and exchange plate heat packs in a variety of materials for call off. We can meet our customers' requirements faster than most other suppliers, usually provide spares quotations within 24 hours and offer a variety of delivery options.

PROJECT AND TEAM CREDENTIALS:

- District heating and energy centre site optimisation, decarbonisation and commissioning projects packages
- Manufacture and installation of full district heating system (+20 plant rooms)
- Plate heat exchanger refurbishments in various locations for FM customer
- Improvement to district heating systems; connection and future expansions
- District energy centre and sub-stations for a 16 plot development
- Chiller deck and full services distribution for energy centre
- Boiler controls and instruments replacements
- Public and private sector major projects delivered
